

## Lilker Associates Adds Full MEP Engineering Design Capabilities at DC Area Office

### Appoints Jeffrey Hildreth, PE, LEED® AP, as Director of Engineering

**NEW YORK, Dec. 1, 2014** —Lilker Associates Consulting Engineers announces the opening of a full-service MEP engineering design office in the Washington, DC area, under the direction of Jeffrey Hildreth, PE, LEED AP. Lilker's mid-Atlantic engineering services team will share space in Falls Church, VA with Lilker EMO Energy Solutions, the firm's wholly owned subsidiary specializing in energy audits, commissioning and retro-commissioning, LEED consultation and energy modeling.

"Establishing an engineering design presence in the mid-Atlantic extends Lilker's geographic reach and affords us an opportunity to offer our Washington, DC-area clients, and beyond, a full range of design and energy-related services from one office," says Bruce Lilker, president of Lilker Associates. "We're pleased to have someone of Jeff's caliber and knowledge of the market on board."

*Jeffrey Hildreth*

A professional mechanical engineer with firm roots in the mid-Atlantic, Hildreth has designed building systems for numerous private sector firms and government entities in the Washington, D.C. area over the past decade. Upon graduating from Virginia Polytechnic Institute and State University, Hildreth joined Roanoke-based HSMM, now part of AECOM, and advanced to the position of Mechanical Department head. His experience there includes design of HVAC and plumbing systems for the Department of Defense, General Service Administration, the Army Corps of Engineer, and the Architect of the Capitol. Most recently, he focused on private sector work at Dewberry Engineers in Fairfax, VA, where he designed systems for high-rise office buildings and tenant fit-outs.

"The challenge of starting up an engineering office for Lilker in the Washington, DC area was a huge draw for me. Our goal is to deliver the highest quality engineering design and integrated energy services for our clients, and to uphold the impeccable reputation Lilker has built over its 30-year history in the Northeast," says Hildreth.

According to Lilker EMO Energy Solutions Managing Director Eric Oliver, "Bringing on Jeff Hildreth and Lilker's MEP design component complements our energy and sustainability service capabilities, and offers our clients a new level of comprehensive service offerings from building design concept through construction."
